## PREFACE

The International Standard Serial Number (ISSN) Directory is a list of Registered Serials and Publishers in the Philippines. The Directory is prepared annually by the Bibliographic Services Division. This 2022 annual accumulation consists of 516 number of serial and continuing resources.

Serial and continuing resources title with different format have different ISSNs such as:

Sample entry:

<b>The Bright Pen</b>	(title of the publication in printed format)
Pamantasan ng Lungsod ng Muntinlupa	(publishers' name )
Starting date: 2016	(the first issue of the publication)
Annually	(frequency)
<b>The Bright Pen (online)</b>	(title of the publication in online format)
Pamantasan ng Lungsod ng Muntinlupa	(publishers' name )
Starting date: 2016	(the first issue of the publication)
Annually	(frequency)

Publisher name appeared in the list is based on the documents submitted by the publishers, sub-unit who are part of the organization appeared first before the main unit example:

College of Business and Accountancy	(sub-unit)
Wesleyan University of the Philippines	(main organization)
College of Arts and Sciences	(sub-unit)
Department of Arts and Humanities	(sub-unit)
Cagayan State University	(main organization)

The staff exerted much effort to verify the information given in this volume, if some errors or names however, have been inadvertently omitted, such omission, if brought to the attention of the staff, shall be highly appreciated and shall be corrected in the next edition of this directory.

This work was done in-between interval in current national bibliographic activities and a cooperative undertaking of the Bibliographic Services Division staff.

## INTRODUCTION

### What is ISSN?

ISSN stands for International Standard Serial Number. It is an international identifier for serials and continuing resources in the electronic and print worlds. It can be assigned to any serial or continuing resources whether past, present or to be published in the foreseeable future whatever the medium of production (e.g. print, online, CD-ROM, etc.). Some examples are journals, magazines, newspapers and annual reports [print and electronic], databases, websites.

It is composed of the prefix ISSN followed by two (2) groups of four (4) numbers separated by a central hyphen. The last character is used as a check digit and can be a numeral or the upper case letter X.

Example: ISSN 2094-9987 or ISSN 2243-724X

The assignment of an ISSN does not imply any exclusive rights to a title or any legal evidence with regard to ownership of rights. However, ISSN is used by reproduction rights agencies in some countries for the management of their system of copyright fees and royalties levied, for example, for the photocopying of articles

### ISSN in the Philippines

The ISSN National Center in the Philippines started operating in late 1975 with the National Science Development Board (NSDB) as the National Center. In 1981, the ISSN National Center was transferred to the National Library as part of its integrated bibliographic services. This is in keeping with the internationally accepted practice of establishing National Centers within the framework of national libraries together with the national agency for ISBN as part of its supportive programs.

**What is the used of ISSN?**

The ISSN is the unique identifier for serials, is used by many different types of organizations and interest groups to fulfill a wide range of purposes:

**Publishers and subscription agencies:** ISSN enables disambiguation between titles that are the same or similar to each other. It is a key data element for successful Open URL implementation.

**Press distributors:** Faster and easier distribution thanks to the embedding of ISSN in EAN 13 bar codes.

**Libraries and union-catalogues:** Records can be downloaded in order to update a local catalogue or database. Valuable for file matching and de-duplication; for document delivery and inter-library loan; for transactions with subscription agencies [ordering, claiming, paying invoices, etc.].

**Scholars, Researchers, Scientists:** a basic requirement for all scholarly serials and publications: it is taken into account in the evaluation process of scholarly publications.

**Electronic resources management:** The ISSN is the major key for the **access:** building of and knowledge bases for the management and access to electronic resources, and for the accurate building and processing of Open URLs.

**Publications eligible for ISSN assignment**

ISSN is requested only if the publication is either print or electronic which belongs to one of the categories below:

**Serial.** A continuing resource in any medium, issued in a succession of discrete parts, usually bearing numbering, that has no predetermined conclusion. Examples of serials include journals, magazines, electronic journals, ongoing directories, annual reports, newspapers, monographic series, and newsletters.

**Ongoing integrating resources.** Electronic publications that are updated such as websites, blogs, institutional repositories, directories and databases.

**Publications not eligible for ISSN assignment**

Personal resources (personal web sites and web pages, online diaries)

Resources focusing on a company, a product, an institution or an organization advertising and promotional websites, commercial web sites, product information web sites, company, organization and institutional websites.

Ephemeral resources or materials that is transitory or short-lived.  
Web sites consisting only of links.

Books. The identifier applicable to books is the International Standard Book Number (ISBN).
